Communication, Electronics,

About Me:

Computer Engineering diploma student with a strong passion for coding, 3D design, and innovation.

Good in HTML, CSS, JavaScript, and Blender, having completed various personal technology and rendering projects.

Passionate to solve real-world problems, quick to learn, and dedicated to creating meaningful technological solutions.

Experience:

While I am seeking my first internship, I have completed several personal projects and developed valuable skills through self-directed work.

Projects:

Portfolio Website (REREAL Brand):-

A personal portfolio site made from Wix Studio using and make the UI in Figma .

Hardware *Designed to showcase my 3D work, coding skills, and brand identity. Includes animations, creative UI.*

REREAL website:-

Some other platforms:

ATCC Project (Any Time Contact, Any Time Call):-

A web app that helps users access their phone contacts from the cloud when their phone is dead.

Uses Gmail login and a secure system to view and copy saved contact numbers. Built with HTML, CSS,

JavaScript for frontend and backend logic.

3D Projects (Blender + Rendering Work):-

Created high-quality 3D animations, car scenes, and product renders using Blender. Worked with

camera tricks, lighting, materials, and rendering optimization. These are personal projects

posted under my brand, REREAL Studio. **INSTAGRAM :- @r._.erreal**

Education:

Diploma in Computer Engineering — Silver Oak University (August 2023–Present)
Currently pursuing 4th semester

Secondary Education: Ambuja Public School, Rabriyawas (2013–2023)
Class 10 Score: 59.8%
